

Kasutusala

ESSVE naelutusplaadid on mõeldud kasutamiseks erinevat tüüpi puitkonstruktsioonide liitmisel. Tavaliselt kasutatakse juhul, kui sõlm-punkt on katusesõrestiku konstruktsioonides.

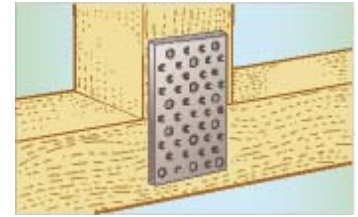

Kirjeldus

Valmistatud 1,5 või 2,0 mm kuumtsingitud teraslehest. Tellitava kaubana on saadaval ka roostevaba happekindel A4 versioon. Plaadid

on 5 mm aukudega ja augumuster järgib tavalist puidunormi.

Montaaž

Naelutusplaadid monteeritakse nt 4,0 mm ankrunaelte või 5,0 mm ankruruvidega. Detaili saab täisnaelutada või -kruvida. Kui naelad/kruvid ära jäetakse, tuleb seda teha iga naelutusgrupi keskel.
